

NetFusion Investigation Report

Key observations: * Protocol distribution: TCP (36.6%), QUIC (33.3%), TLSv1.3 (11.4%) * Encrypted traffic is present (TLS, SSL, QUIC) * Top sources and destinations indicate internal and external communication * Notable observation: QUIC protocol usage is significant * Uncertainty: Specific communication patterns and purposes are unclear due to limited data.

Investigation Findings

Encrypted Traffic Observed TLS encrypted communications were detected.

Legacy SSL Detected SSL traffic was observed. Legacy SSL should be reviewed.

QUIC Traffic Detected Modern encrypted QUIC traffic was observed.

DNS Resolution Activity Domain name lookups were detected.

IOC Detection

Legacy SSL Usage (MEDIUM) SSL traffic observed.

Encrypted Traffic (INFO) Encrypted communications detected.

High Conversation Volume (INFO) 73 conversations observed.
